Asset Management

Contents The workshop in Asset and Maintenance Management (PAMM) provides you with an integrated and comprehensive training intervention in the complementary disciplines that direct the management and maintenance of physical assets.

The programme provides you with a better awareness and tools to shape collaborative efforts that are required to effectively manage and maintain assets across a wide range of technical, engineering, finance, logistics, communications and other functions.

You will gain the necessary skills to realise effective physical asset management by focusing on particular aspects of asset management principles and practices, principles of maintenance management, as well as maintenance approaches and strategies

- Outcomes**
- Understand, summarise and classify assets.
 - Manage current assets (i.e. cost and risk of investing in current assets).
 - Manage cash.
 - Manage stock.
 - Manage debtors.
 - Manage creditors.
 - Interpret and present financial reports.
 - Apply the relevant financial ratios.
 - Manage and maintain fixed assets (i.e. asset depreciation, disposal of assets, capital budgeting).
 - Identify need for and take corrective action.

Target Audience Anyone who wishes to update themselves on Asset Management and how to implement it for the benefit of their organizations.
